

## a Protocol

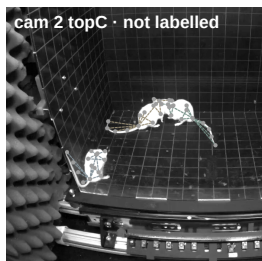

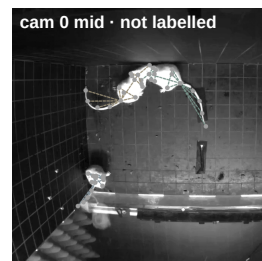

### 1. Label 2 anchor views

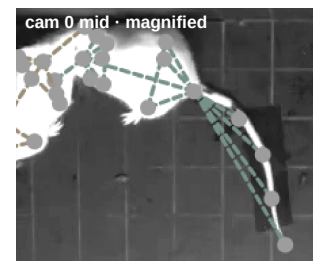

### 2. Triangulate

### 3. Reprojections appear

### 4. Accept or nudge

### 2-anchor solve, this frame

anchor views 1.4–4.5 px

the other 6 2.5–24.6 px

dotted = reprojected

solid = detected

## b Placements vs rig size

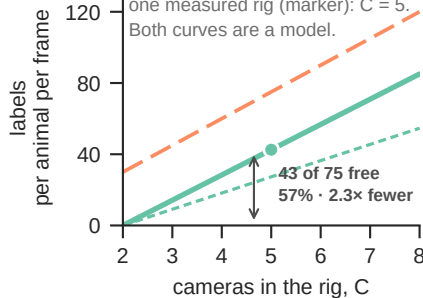

labels needed,  $C \times N$  (assumed)

free by reprojection,  $\tau = 10$  px

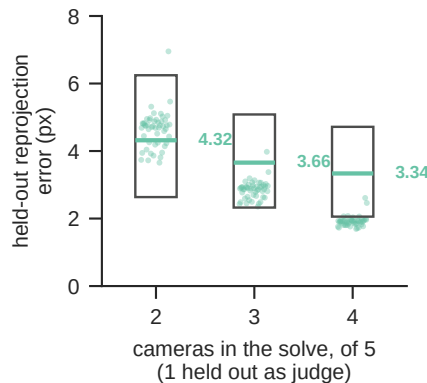

free by reprojection,  $\tau = 5$  px

one measured rig (marker):  $C = 5$ .

Both curves are a model.

## c Cost of two anchors

## d Anchor-pair geometry
