

a Grouping strategies

Exhaustive hypothesis testing

Maree et al. 2024 · $(A!)^C$ per frame

Greedy per-view assignment

LUC3D · C Hungarian solves, $O(C \cdot A^3)$

b Hypotheses per frame

2 cameras
4 cameras
6 cameras
8 cameras

c One grouping hypothesis

d Grouping accuracy

exhaustive
greedy, fresh anchor (shipped)

e 3D term parameter sweep

exhaustive greedy

app default $r = 6$

f

Time per frame
