

a Grouping strategies

Exhaustive hypothesis testing

Maree et al. 2024 · $(A!)^C$ per frame

Greedy per-view assignment

LUC3D · C Hungarian solves, $O(C \cdot A^3)$

c Hypotheses per frame

2 cameras
4 cameras
6 cameras
8 cameras

b Association cost

Cost per (target, detection) pair

d Grouping accuracy, head to head

e 3D-term ablation

ID-switch rate
cross-view IDF1
thin dotted: shipped tracker
bold solid: fresh anchor

f Time per frame
