

a Grouping strategies

Exhaustive hypothesis testing

Maree et al. 2024 · (AI)^C per frame

Greedy per-view assignment

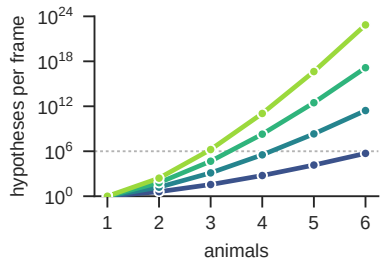

LUC3D · C Hungarian solves, $O(C \cdot A^3)$

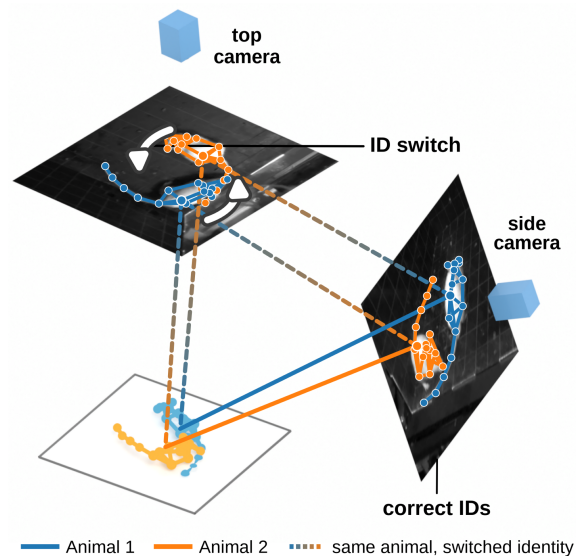

b

Hypotheses per frame

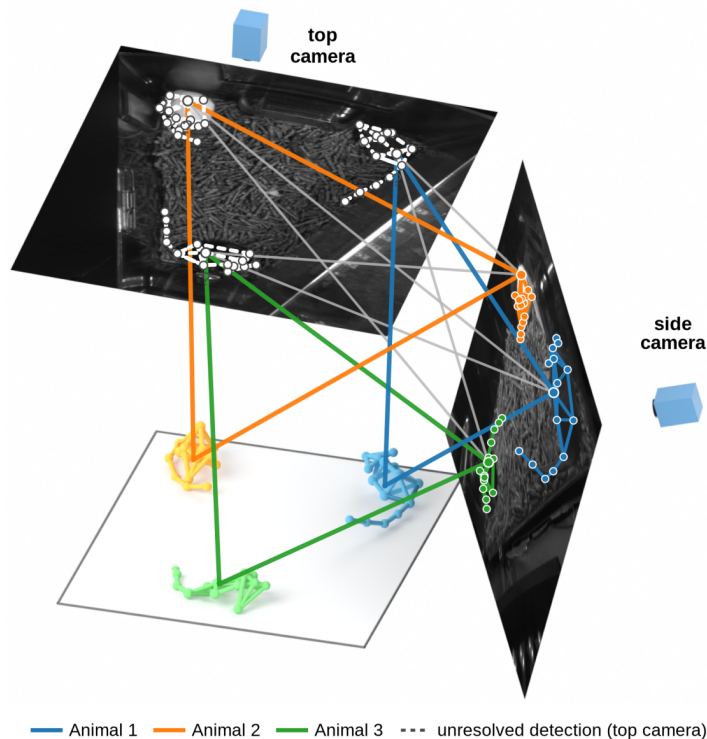

2 cameras
4 cameras
6 cameras
8 cameras

d An identity switch in one camera view

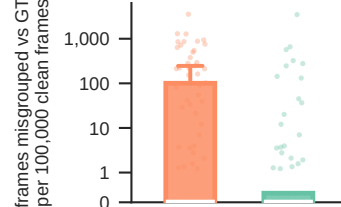

c Visualization of ID grouping hypotheses in two camera views

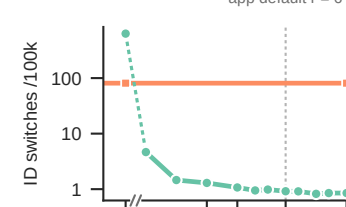

e Grouping accuracy

exhaustive
greedy, fresh anchor (shipped)

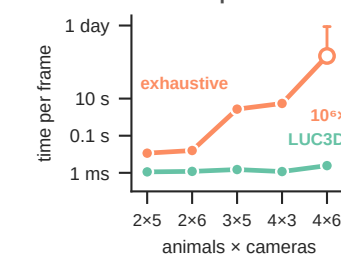

g 3D term sweep

exhaustive
greedy
app default $r = 6$

f Time per frame

h cross-view IDF1
