

a Per-view reprojection error

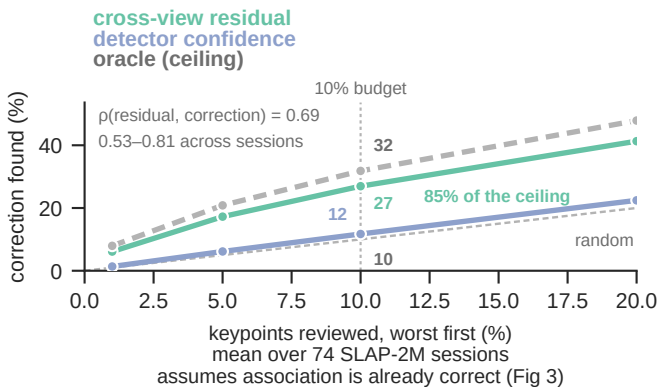

solid = detected · dotted = reprojected from the 3D · red = the error

b Proofreading loop

c Correction found per review budget

a: one frame of an 8-camera recording in LUC3D, 3D solved from all 8 views (the app's normal state, not a held-out or anchored solve).

c, d: 74 SLAP-2M sessions, 1,561,915 keypoints. The ranking in c and d is measured offline: LUC3D reports the residual for the frame you are on and has no ranked worklist.

d Per session, 10% budget
