

a Protocol

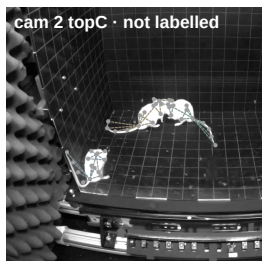

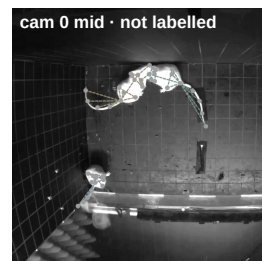

1. Label 2 anchor views

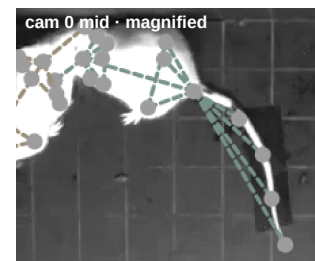

2. Triangulate

3. Reprojections appear

4. Accept or nudge

2-anchor solve, this frame

anchor views 1.4–4.5 px

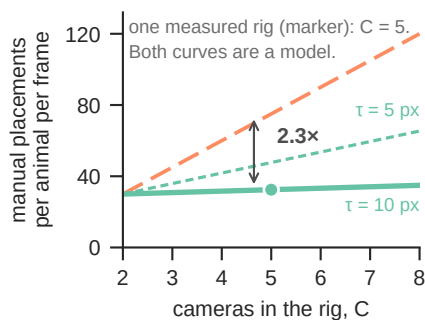

the other 6 2.5–24.6 px

dotted = reprojected

solid = detected

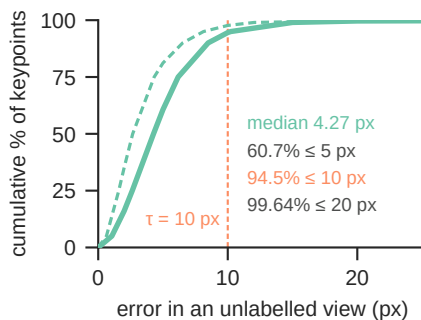

b Placements vs rig size

traditional (assumed)
reprojection-aided

c Cost of two anchors

— vs the view's own detection
-- vs the reference 3D

d Anchor-pair geometry
